

RPM Two Flap Carton Gluer / Sealer

\$30 per day

+ GST, Delivery and Installation

Capable of sealing up to
25 cartons per/minute

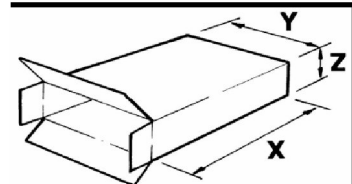

Operation:

The operator manually erects and loads the carton with the product. The carton is then placed into the infeed rails and pushed forwards into the machine with the end flaps in the horizontal position. The machine takes the carton through the machine and applies hot melt glue to the carton, folds and seals it ejecting through the top of the machine.

Adjustable for a wide range of carton sizes

X – 80 to 300mm
Y – 50 to 250mm
Z – 20 to 100mm

Standard Features (included):

- Vertical lift flap folding to help produce a consistently square box.
- Full safety interlock system to give easy access to the machine while being safe and simple to operate.
- Simple and easy size change with only one change part.
- Simple dauber glue applicator for use with a wide variety of adhesives and carton materials.
- Fitted with castors making the machine easily mobile.
- Built to stringent quality control procedures to ensure customer satisfaction.
